

Tapping Into Integration:

Bringing travel, expense, and AP together
to drive your competitive advantage.

SAP Concur

The less the merrier.

You've got travelers and suppliers all over the globe. You've got expense reports and invoices coming in from everywhere. So yes, you've got enough going on.

But what if you had one, unified, organized, intelligent platform where everyone involved had all the data, all the insights, and all the tools they needed to make a greater impact?

? **What if travel managers had one place to manage every trip** – so they could ensure traveler safety, control traveler spending, and ramp up traveler productivity?

? **What if finance had one place for every invoice, every transaction, every digit of data** – so they could see what's spent and what's pending and get a better handle on budgets and forecasts.

? **What if travelers had one place for bookings, budgets, itineraries, and information** – so they could focus on the work and not the travel, and maybe even enjoy the experience?

If you had all of these things in one place, you could get more done in less time with less hassle. And no one could compete.

58% of those not using an integrated travel and expense platform cite lack of integration as their biggest challenge.

Working as one.

In a fiercely competitive world, every tool or technique that gives you an edge is worth consideration. Every opportunity that's too challenging for the competition is worth trying. And every chance you get to grow, to innovate, to lead is worth taking. But you can't take a scattershot approach.

Your chance to lead takes a singular platform for travel, expenses, and AP – one place where all your data and all your workflows work together. One single source of truth that provides efficiency, control, and visibility.

When these systems are connected, you can:

- Easily integrate with accounting, ERP, and finance solutions – so you can run leaner, faster.
- Offer more ways to pay, more flexible travel options, and more app extensions – so employees enjoy an easier, more engaging experience.
- Drive greater value into the business – so you can be even more competitive.

One platform for travel, expenses, and AP is an investment in impact. It's the balance between stability and innovation. It's AI and analytics fueling true transformation. It's how you'll manage everything from spending to safety to sustainability.

It's what moves finance forward faster, and there's only one best way to get going: **SAP Concur solutions.**

SAP Concur: A singular platform for a clear and competitive financial picture.

If your travel, expense, and AP systems don't work together, you end up doing more work. But when you can see all of that spending, all in one place, you can be sure your policies are being followed, and you'll know you're protected from costly mistakes, overpayments, fraud, and more.

You'll be able to give your employees a simple, consistent experience as they book travel and submit expenses – so instead of interrupting their work, their work trips can be both productive and worthwhile.

And because it's all together, you'll get a real-time look into accurate, relevant spending data – so you can manage your budget and make more precise forecasts in less time.

SAP Concur solutions make it easier to get work done. Make sure you have that advantage.

78% of organizations who moved to SAP Concur from a non-integrated solution report increased compliance of 28%, on average.

SAP Concur: Built-in connections for more competitive options.

You're not just connecting travel, expense, and AP processes, you're tapping into proven connections with finance applications, travel suppliers, payment providers, global distribution systems, travel management companies, and more.

And that makes it easier to build business all over the world.

With SAP Concur solutions, you're part of an ecosystem that is seamlessly integrated into top ERP and accounting solutions. You're connected to payment providers that give you multiple payment options. You can work with the Travel Management Company (TMC) of your choice and connect with a wide range of innovative app partners.

With automatic integrations with travel suppliers, you get more content and more flexibility for your travelers – all within policy.

You can also be sure that every digit of data – every itinerary, every transaction, every location of every traveler, and every bit of spend – all flows into your system automatically.

SAP Concur solutions give you more ways to do more and stay on top of it all. Make sure you have that advantage.

SAP Concur: Innovation over the competition.

Connect your systems on the SAP Concur platform, and get access to more extensive travel, expense, and AP data – plus decades of experience with tens of thousands of businesses. So instead of trying to innovate on your own, you have immediate access to the category’s leading innovations.

- You’ll have AI and machine-learning expertise helping fine tune and reimagine your processes from booking through auditing.
- You’ll have safer, smarter travel built on faster, more intelligent tools.
- You’ll have more productive, more engaged travelers (and they’ll have fewer tedious tasks on their to-do lists).
- And you’ll have more ways to control what gets spent – guiding employees as they do the spending – so you can stay on top of budgets, policies, and everchanging regulations.

You’ll also have the latest tools to deliver the sharpest analysis and smartest plans. And the second those tools are upgraded, you get the update.

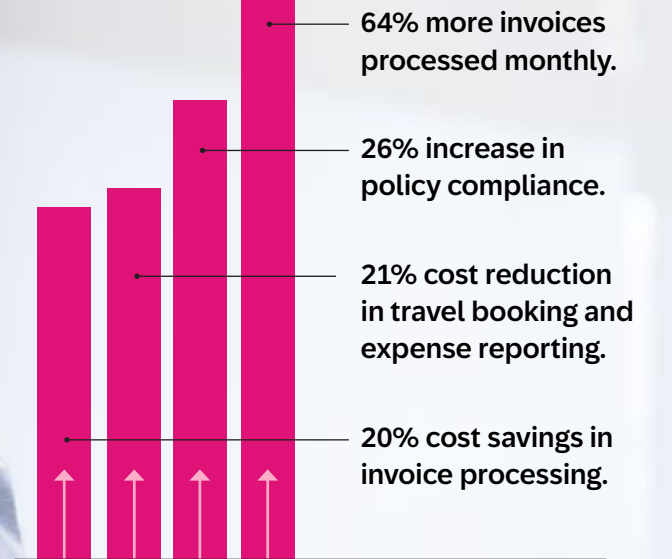

SAP Concur keeps you ahead of innovation, so can stay ahead of the competition. Make sure you have that advantage.

The proof is in the performance.

Integrating travel and expense and automated AP can lead to:

2X
more expense
report processing.

10X
faster
reimbursement
processing.
